- Shelf supports are required for all applications to stabilize beam. If not used then beam locking clip is required
- Aisle side Upright posts must be anchored to floor
- Total weight of palletized goods MUST NOT exceed one half of evenly distributed Beam capacity
- Allow at least 3" clearance between pallet and Upright Frame, at least 4" clearance between pallets

Due to significant fluctuations in raw material prices, all prices listed herein and quoted are subject to quarterly surcharges as needed for raw materials pricing escalation. The customer will receive acknowledgement of his order, showing prevailing prices at the time the order is processed. State or other sales or use taxes will be charged when applicable. All quotations automatically expire at the end of 30 days (unless specified otherwise) and are subject to termination by notice within that period.

## TERMS OF PAYMENT

One of the following terms or combination thereof can be used to pay for an order:

1. Cash-with-order.
2. Mastercard, Visa, American Express
3. Net 30, date of shipment (requires credit approval).

It is our policy to extend Net credit terms to qualified applicants only. These terms may be withdrawn at any time. A service charge of 1 1/2% per month may also be added for any past due unpaid balances.

## ACCEPTANCE

All orders, contracts, and agreements are subject to the acceptance and approval by Lozier at its corporate head quarters in Omaha, NE. Lozier shall not be liable for any delay in the performance of any order or contract or in the delivery of any goods, or for any damages resulting from such delay, when such delay is directly or indirectly caused by or due to fire, flood, accident, riot, act of God, war, governmental decree or order, strike, labor difficulties, shortage of labor, fuel, power, material or supplies, transportation delay or any other delay or causes (whether or not similar to any of those hereinbefore specified) beyond Lozier's reasonable control. Order acceptance will be per the conditions and terms outlined in Lozier acknowledgement. Mailing of the acknowledgement will signify Lozier acceptance of the order.

## CHANGES AND CANCELLATIONS

Customer requested changes and cancellations are subject to approval by Lozier. Every reasonable effort will be made to accommodate these requests without additional cost to the customer. Any manufacturing or engineering costs incurred will be charged to the customer.

## SHIPMENTS

Method and route of shipment are at Lozier's discretion unless Lozier is furnished with complete shipping instructions at least ten (10) days before the scheduled shipping date. Although Lozier tries to fill all orders completely, it may be necessary at times to back-order to provide better service (unless specifically instructed by the customer not to back-order). Freight is F.O.B. city of shipment. Items that ship directly from Lozier's supplier(s) are F.O.B. Omaha. *Unless otherwise instructed, all shipments will be Freight Collect.*

## FREIGHT CLAIMS

With any loss or damage of freight always contact your Lozier Account Service Representative. Listed on this page are the types of losses which may occur and your responsibility in handling them.

## LOSS OF FREIGHT

It is the receiver's responsibility to count the freight at the time of delivery. Any exception must be noted on the carrier's delivery receipt at this time. Failure to note any exception at this time will result in nonpayment for a loss of freight claim.

## DAMAGE OF FREIGHT

As with a loss of freight, damage of freight must be noted on the carrier's delivery receipt at the time of delivery. It is the receiver's responsibility to make sure that the freight is inspected for visible damage and that the number of pieces damaged is marked on the carrier's delivery receipt. Failure to note visible damage at the time of delivery will result in non-payment of a damage to freight claim. Salvage must be held for the carrier.

## CONCEALED DAMAGE

If the receiver receives goods in apparently good condition but there is concealed damage, it is your responsibility to contact your Lozier Service Representative within 5 calendar days from delivery. You must keep the product and the packaging for an inspection by the carrier. Failure to handle a concealed damage claim in this manner could greatly reduce the amount recovered from the carrier.

## RETURNED GOODS

Returned Goods requests must be submitted to Lozier Corporation within 60 days after receipt of product. Authorization requires written approval from Lozier before return. Only stock products will be considered for return and only items in original and unbroken packaging will be accepted. A handling and restocking charge of 25% of the invoice price will be charged for all approved returns. Submit requests to your Lozier Sales Representative.

## WARRANTY

Lozier warrants to the original purchaser that all products manufactured by Lozier are free from defects in material and workmanship. Lozier's obligation under this warranty is limited to repairing or replacing at our plant any part or parts which shall, within one (1) year after delivery to the original purchaser, be demonstrated to be thus defective under normal use or service in climate controlled environments. **SELLER EXPRESSLY DISCLAIMS ANY AND ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE AND BUYER'S SOLE REMEDY IS LIMITED TO THE PROVISIONS CONTAINED HEREIN.** No modification of this warranty shall be valid or binding unless in writing and signed by an officer of Lozier.

This warranty is void if products alleged to be defective have been: (i) misused, overloaded, modified, improperly installed or used in a manner other than the intended purpose or application, (ii) altered or repaired without Lozier's written consent, (iii) stored improperly or damaged after shipment, (iv) exposed to high humidity or other corrosive environments, or (v) not promptly reported to Lozier.

## PRODUCT PACKAGING/SHIPPING

---

Packaging/Shipping plays a vital role in providing high quality service to our customers.

We make every attempt to eliminate unnecessary packaging materials and deliver product free of damage.

In general there are two primary packaging methods:

1. **CORRUGATED CARTONS:** Typically small quantities per package; e.g., 4' x 19" shelves, 2 per carton. Individual carton packs can provide for the best trailer cube utilization. Customers without material handling equipment should choose an all cartoned shipment.

Products available in **carton package quantity only** will be automatically rounded up to the nearest carton pack quantity.

2. **BULK PACK:** Uncartoned product of the same item stretch wrapped to a pallet reduces installation time and trash disposal costs. Trailer cube utilization can be very good depending on product mix but can often be less than cartoned product. These loads are best suited for IRC shipments to sites with material handling equipment.

Many products are available as bulk pack. Orders in excess of full bulk pack quantities will be filled with cartoned product. If bulk packaging is desired, please indicate so on your order and the Account Service department will convert to bulk pack quantities as appropriate.

Bulk pack shipments are available at no additional cost and **must ship via IRC carrier in 102" wide trailers.**

## PRODUCT SAFETY INFORMATION

---

### **WARNING** **FOR YOUR SAFETY**

These instructions and safety information should be reviewed with all store personnel, and along with all other instructions for your Lozier products, must be preserved and provided to any subsequent user or purchaser of these fixtures. Additional copies available upon request.

- Install all shelving according to installation instructions and use components only as instructed. Shelving and components should only be installed or rearranged by trained personnel who have read and understand these instructions and warnings.
- Local codes and regulations concerning building, fire, sanitation, or seismic requirements may apply to some installations. It is the responsibility of the owner of these fixtures to check with local building authorities to determine what codes or regulations, if any, apply and always install the shelving in compliance with any such requirements.
- When installing or rearranging shelving, never move assembled shelving.
- Do not combine Lozier products with non-Lozier products.
- Never use damaged parts. Damaged parts may cause shelving to be structurally unsafe or create exposure to sharp or pointed edges. If parts were damaged in shipment, do not use and contact your Lozier Account Service Representative. If parts are damaged after shipment, discontinue use immediately and order replacement parts.
- Do not exceed Allowable Load Limits. Make certain you calculate the unbalanced load. Exceeding allowable loads may cause the shelving to tip over or collapse.
- Base Fronts, either open or closed, are required for structural integrity and stability. Use of shelving without Base Fronts may cause the shelving to collapse. Caution: Use of any shelving without Closed Base Fronts (CBF) may allow material handling or floor cleaning equipment to collide with the Base Brackets causing the shelving to be knocked out of alignment or collapse.
- All components which require trim such as Uprights (U) and Base Brackets (BB) must be installed with trim pieces. Untrimmed parts may have unfinished edges that must be covered by trim to avoid exposure to store personnel or customers. Use Molding End Trim to cover exposed corners of S-style shelves.
- Do not hang Peg Hooks, Shelves or other accessories on the back side of a Wall Section or any section without Base Brackets. Wall Sections do not have Base Brackets (BB) on the back side to provide support, and use of the back side to display merchandise may cause the section to tip over.
- To avoid store personnel or customers accidentally coming in contact with display fixtures, never allow any Shelf, Peg Hook, or other display to protrude into an aisle or to extend beyond the edge of the Base Deck or End Deck (if used).
- All End Merchandising Panels intended for use with Shelves or accessories must include End Decks or other floor display to direct people away from the shelves or displays above the End Deck or other floor display.
- When using End Merchandising Panels on a fixture, where the first shelving section behind the EMP is not equipped with Shelves that engage into the Upright slots, Top Rail Hold Down Clips with Upright inserts (Lozier P/N HMA4381) must be installed. Failure to do this could allow the Top Rail to become disengaged, and the fixture to fall over, causing product damage or personal injury.
- Do not lean tall or heavy items against shelving unless shelving is anchored to a suitable building wall, to the floor, or is otherwise braced to prevent overturning. The weight and force of leaning items on unanchored or unbraced shelving may cause the shelving to overturn or collapse.
- Shelving (or racks) that are leaning or bending when loaded may indicate a dangerous overload or impending collapse. Loads should be immediately reduced, and the cause for this condition should be corrected, before reloading. Refer to appropriate installation instructions to assure shelving (or racks) are properly assembled, replace any damaged components or parts, and do not exceed recommended maximum loads or engage in any other unsafe use of the shelving (racks).
- Provide safe access to all levels of storage & display shelving in accordance with applicable OSHA regulations. Never allow anyone to climb, walk, or stand on shelving. These shelves were not designed to withstand the extra weight and impact of climbing, walking and standing, and the added weight and impact of such actions may cause the fixture to collapse.
- Never alter, modify or otherwise structurally change the shelving or any of its component parts. Modification or alteration may cause the shelving or component part to become structurally unsafe resulting in tipping, collapse or other failure of the fixture.
- When using an Open Back System, do not use No-Base Wall End Displays (WEDNB\_). Using a WEDNB\_ with an open back system will put a side load into the fixture causing it to collapse.

**IMPORTANT! Failure to follow these instructions and warnings may result in overturning or collapse of the fixture, resulting in personal injury to your employees or customers, damage to property, or damage to the fixture itself.**

## PRODUCT SAFETY INFORMATION

To help avoid overturning:

- The height of the Uprite (including Extension Uprites, if used) should not exceed the leveler spacing times six.  
See the charts below.
- If Uprites on Wall Sections exceed the heights listed, the Base Bracket and the Uprite Levelers must be anchored to the floor or otherwise braced.  
See Display Shelving Instructions 01-13.
- If Uprites on Gondola (Island) Sections exceed the heights listed, the Base Bracket levelers must be anchored to the floor.
- Base Brackets of freestanding Wall Sections must be anchored to prevent backward tipping. If Uprite height to leveler spacing exceeds 6:1, the Base Brackets and Uprites must be anchored.
